

**Amendments to the Claims:**

Please amend claims 3 and 19 as shown in the following listing of claims.  
This listing of claims will replace all prior versions, and listings, of claims in the  
5 application.

1 1. (canceled).

1 2. (previously presented) A terminal as claimed in claim 19, wherein the  
2 antenna feed is coupled to the ground conductor via a capacitor.

1 3. (currently amended) A terminal as claimed in claim 2, wherein the  
2 capacitor is a parallel plate capacitor formed by [[a]] the completely flat  
3 conducting plate and a portion of the ground conductor.

1 4. (previously presented) A terminal as claimed in claim 19, wherein the  
2 antenna feed is coupled to the ground conductor by capacitance between an  
3 inductive element and the ground conductor.

1 5. (previously presented) A terminal as claimed in claim 19, wherein a slot is  
2 provided in the ground conductor.

1 6. (previously presented) A terminal as claimed in claim 5, wherein the slot is  
2 parallel to the major axis of the terminal.

1 7. (previously presented) A terminal as claimed in claim 19, wherein the  
2 ground conductor is a handset case.

1 8. (previously presented) A terminal as claimed in claim 19, wherein the  
2 ground conductor is a printed circuit board ground plane.

1 9. (previously presented) A terminal as claimed in claim 19, wherein a  
2 matching network is provided between the transceiver and the antenna feed.

1     10.     (canceled).

1     11.     (canceled).

1     12.     (canceled).

1     13.     (canceled).

1     14.     (canceled).

1     15.     (canceled).

1     16.     (canceled).

1     17.     (canceled).

1     18.     (canceled).

1     19.     (currently amended) A wireless terminal comprising a ground conductor  
2     and a transceiver coupled to an antenna feed, wherein the antenna feed is  
3     capacitively coupled to the ground conductor by means of a completely flat  
4     conducting plate separate from and opposed to a portion of the ground conductor.
